

MIMBUS STONE - STONE CUTTING

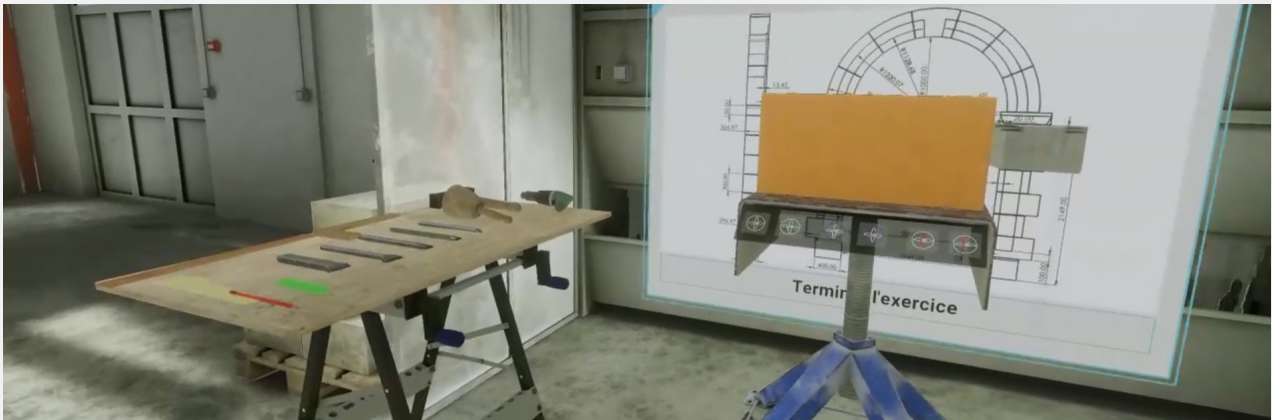

Virtual educational tool for the training of stonemasons

MIMBUS STONE immerses your learners in the environment of a stonemason to acquire the basics of the gesture in complete safety, while respecting the ancestral know-how of this noble profession.

BENEFITS

-  Promote the stonemasonry profession through virtual reality
-  Offer an attractive new educational resource
-  Optimise your workshop occupancy times
-  Carry out manipulations in complete safety
-  Reduce the apprehension of learners when moving on to learning in real conditions

PEDAGOGICAL MODULES

GESTURE ACQUISITION

1

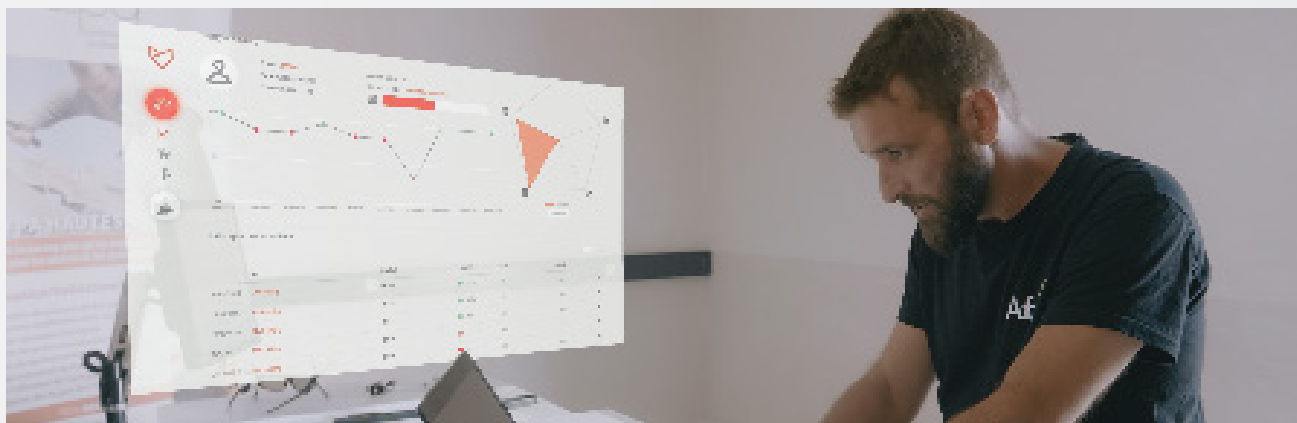

To familiarise oneself with visual aids for the acquisition of gestures and to practise the handling of tools by carrying out simple exercises.

FREE STONE CUTTING

2

To go further in the training by letting the learner shape a stone freely and make more and more complex cuts without guidance

SUPPORT FOR SKILLS ACQUISITION

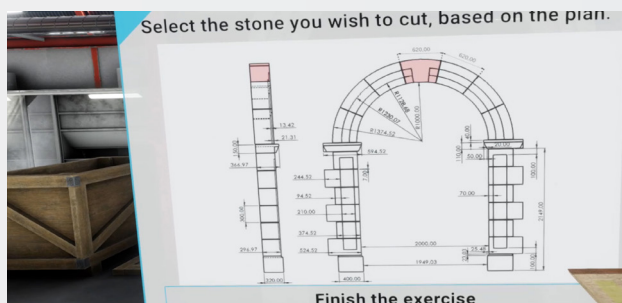

From beginner to expert level, MIMBUS STONE offers you the possibility to adapt the help you want to give to your learners and to adjust the error tolerance allowed according to their skills.

The learner can access the following aids:

- ✓ Area to be removed
- ✓ Pace
- ✓ Recommended striking force
- ✓ Repositioning
- ✓ Angle of incidence

MIMBUS STONE allows you to build a training course adapted to the level of your learners. Analyse their performance to help them acquire the skills of a stonemason. MIMBUS STONE offers you a new pedagogical support to vary the learning between theory and practice.
