

VIRTUAL CONSTRUCT

Scaffolding Safety

Immerse your learners in the heart of a construction site with VIRTUAL CONSTRUCT.

Learners are totally immersed in an ultra-realistic worksite environment.

BÉNÉFICES

- Take advantage of a success-based learning pedagogy
- Boost industry recruiting
- Take advantage of replaying the exercises as often as needed
- Offer your students a fun and dynamic learning experience
- Evaluate your learners' achievements in real time

STEP BY STEP LEARNING

The Virtual Construct «Scaffolding Safety» module is composed of several exercises with simulation scenarios, tutored learning, and the sequential evaluation of risk management and resolution.

Inspection and approval of fixes scaffolding

Use a foot scaffolding

THE PEDAGOGICAL OBJECTIVES

IDENTIFY
RISKS

CLASSY
RISKS

WORK
INDEPENDENTLY

COMPETENCY ASSESSMENT AND SKILLS DEVELOPMENT

Track the skills of your learners and individualize their learning paths with Vulcan.

CUSTOMIZED SUPPORT

Integrate your new immersive learning solutions with the MIMBUS Academy.

1
