

VULCAN

THE ONLY MANUAL SKILLS MANAGEMENT SYSTEM

Designed exclusively for professional training, VULCAN® is the only platform able to analyze in real time the assessments of students training on VR or AR

www.vulcan-edu.com

BOOST THE EFFECTIVENESS OF YOUR VIRTUAL TOOLS DEDICATED TO VOCATIONAL TRAINING

Connect VULCAN to all your simulators

VULCAN allows you to follow training activity from any simulators dedicated to manual trades

Analyze skills

For the first time, objectively analyze your trainee's skills. Accuracy, speed and gesture qualification: VULCAN fits every trade

Manage your Classes

Trainers and pedagogical managers can create and manage profiles per class, group or individually

Centralize your results

VULCAN documents the results from trainees working in VR/AR simulations. The platform analyzes the results and stores it in its database

Follow the activity on simulator

Follow up in real time the assessment of your students working on VR/AR pedagogical tools

Personalized training paths

Adapt VULCAN to your pedagogical approach by personalizing training paths of trainees according to their results

Enjoy a user-friendly platform

VULCAN offers easy management thanks to its ergonomic and user-friendly interface

Share collected information

Among trainers, administrators or with you trainees, develop engagement around your training by communicating results

Several VR solutions already compliant

VULCAN is connected to a ten of simulators. Contact us for more information

Software publisher

VULCAN is easy to install on any XR training solutions (VR and AR). Customers can benefit from the platform features.
