

VINE PRUNING

VULCAN COMPATIBLE

# MIMBUS VITICULTURE

A virtual reality educational tool for vine pruning training

Train your learners in vine pruning all year round and in any weather conditions thanks to virtual reality.

## BENEFITS

-  Offers a new educational tool to reinforce theoretical knowledge, teach proper technique, and allow unlimited pruning practice.
-  Shorten your trainer's learning feedback loop by instantly showing them the consequences of their pruning on the vine.
-  Practice year-round, regardless of season or weather.
-  Train with evidence-based techniques and improve the vitality and output of your vines.

## TRAINING CONTENT

### INTRODUCTION

1

Review the fundamentals learned in class by interacting with vegetative and fruit-bearing organs, determine the potential of the vine stock, and start pruning with proper sap flow management.

### TRAINING

2

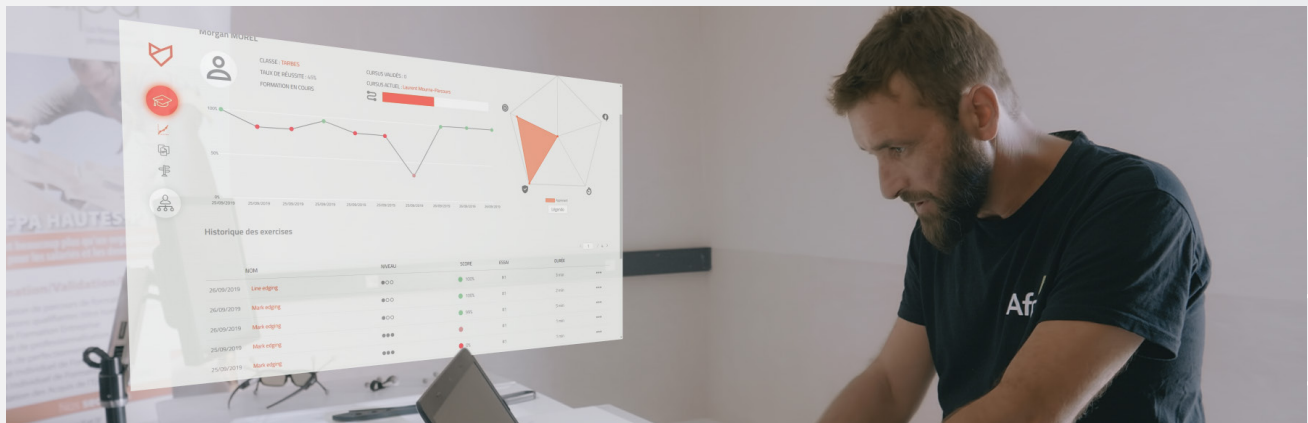

Access six training modules to practice a variety of pruning systems, including single and double cane pruning, bilateral cordon (spur) pruning, head-trained (goblet) pruning and Chablis-style cane pruning.

### FREE MODE AND CHALLENGES

3

Experiment in a virtual vineyard with free-mode, or set up pruning contests between learners in challenge mode.

# SKILL ASSESSMENT

## THEORETICAL KNOWLEDGE

Learner's ability to recognize the vegetative and fruit-bearing parts of the vine

## PLANT PRESERVATION

Learner's ability to apply gentle pruning techniques

## TECHNICAL ACCURACY

Learner's ability to make the correct cuts with the appropriate angle and placement

## EXECUTION SPEED

Learner's ability to perform the correct cuts as quickly as possible

## OVERALL MONITORING

Tracking progress and skills development; individualization of training paths
